October Crop Production

Agricultural Statistics Board Briefing

Anthony Prillaman
Associate Deputy Administrator
Estimation Branch | Office of Analysis and Estimation

October 9, 2026

Multiple Data Inputs
One Estimate

Integrated analysis of multiple data sources to produce accurate and reliable estimates of acreage and crop yield.

FSA Certified Acres

Acres reported and certified by producers with the Farm Service Agency (FSA).

RMA Insured Acres

Acres covered by crop insurance policies administered by the Risk Management Agency (RMA).

Satellite Imagery (Acreage & Yield)

High-resolution satellite imagery used to detect acreage and analyze crop health and yield across fields.

Field Observation (Acreage & Yield)

On-the-ground observations and measurements to validate acres and estimate yield.

Survey Data

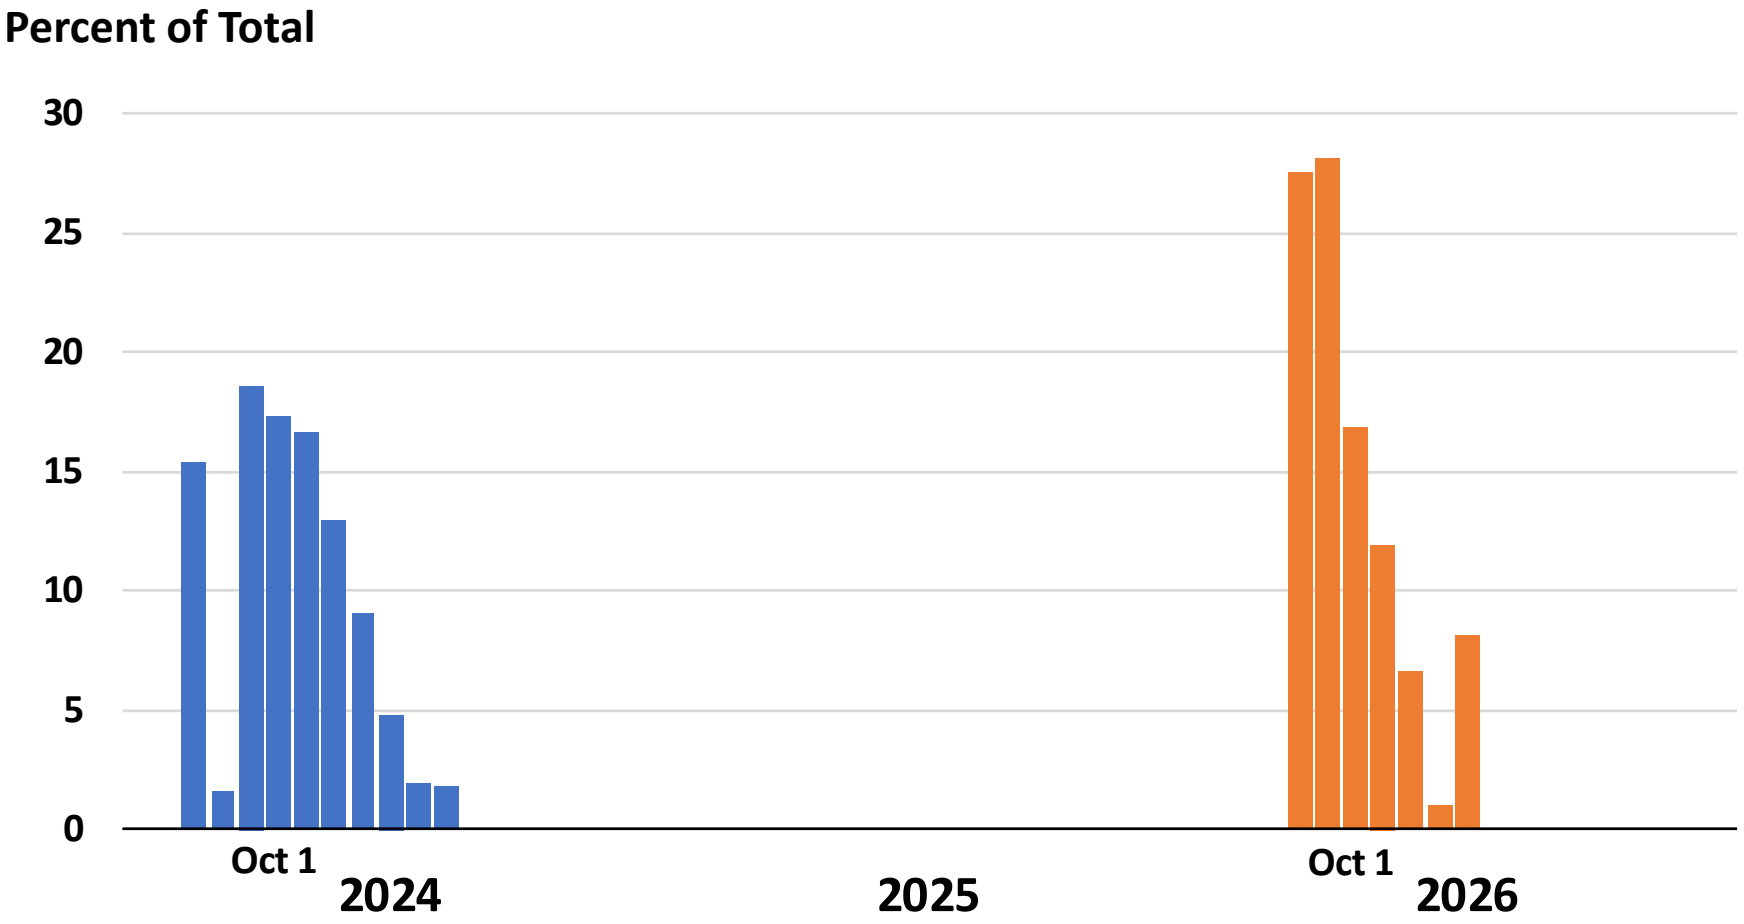

Ground-truth data collected directly from farmers.

NASS reviewed planted and harvested acreage estimates in this report for canola, dry edible beans, and sunflowers. For full methodology and additional data, visit [www.nass.usda.gov.](http://www.nass.usda.gov)
